

Oil Filter Recommendation Update 2015

Round and round we go! We have encountered PF970C filters that have leaked out the stored oil over a 24 hour period. We have observed that the Bosch 3401 is working well. This filter did not leak a drop in 24 hours. It's sitting on a stand for observation.

The filter weighs 13 ounces when new. The filter in the picture weighs 23 ounces.
